

Serger Seminole Flatlock Stocking

1. Flatlock 2 1/2" strips together using a wide flatlock and decorative thread in the upper looper. Cut the created flatlock fabric in 2 1/2" strips and stagger to reserge using flatlock.

2. Cut the stocking and lining from the flatlock fabric and 3 extra lining pieces. (one will be the stocking back side) Cut the stock shapes from the

Fusible fleece and bond fleece to the backside of 2 lining pieces. Place right sides together and serge and create the stocking using three thread wide serger stitch. Create the lining the same way.

3. Place the lining wrong side out into the stocking which is turned right side out. Pin the top edge of the stocking to the lining and serge around the top edge to hold it using

your wide 3 thread serge stitch.

4. Create a cuff about 8" X 5". Serge the short edge right sides together to form a circle. Press the circle in half so the right side is showing to form a cuff. Fit the cuff inside the stocking and sew the cuff to the top edge with a wide 3 thread stitch.

5. Pull the cuff up and fold the cuff over the serge seam to finish.

6. Using 2- 2 1/2" strips X 45" place them wrong sides together and narrow roll serge one edge. Taper the start and stop ends from 1/2" to 2 1/2" for a more natural look in your finished rose. The rose is formed by pulling up the cord to gather the bottom edge. Feed a crochet cord through a serger cording foot or the cording hole in a serger foot. Serger over the cord so you can pull the cord to gather the fabric strip. The rose is finished by rolling the rose to form the bud.

You can tack the finished shape in place.
