

## Walking foot sale at Jenny's Sewing Studio

Do you do quilting or top stitching or use difficult to sew bulky fabrics? The walking foot is the answer to a lot of sewing issues. If you sew on quilt binding, the walking foot will keep the top and bottom layers even as you sew. Do you need to "stitch in the ditch", or sew the borders and quilt edge? The walking foot is the key. I recently sewed a fluffy fleece robe and it was impossible to feed through the machine without a walking foot. I have several types of walking feet on clearance. [Take a look at this link.](#) Most closeouts are in limited supply. Don't miss out!
